

GRAB RAILS

Designed in the UK by Byretech

Byretech's range of 32mm diameter Stainless Steel Grab rails are the best quality and value available.

Made from Marine Grade Stainless Steel and with a minimum of six fixings per rail, they are sturdy and incredibly well made.

Unlike most grab rails available, this range also comes with stainless steel fixings too.

Available in a number of size variants to suit your specific needs.

GRAB RAILS

Designed in the UK by Byretech

Byretech's range of 32mm diameter Stainless Steel Grab rails are the best quality and value available.

The come with fixings and wont rust as they are made from "201" Marine Grade Stainless Steel and they are the lowest profile grab rails available in UK. Protruding just 55mm from the wall, they give you more room in the shower or bath.

The Stainless steel cover plate just locks into position once the rail is secured on the wall.

Stainless steel screws and raw plugs come in the kit as standard, but you can use your own fixings too depending on the application.
