

CHROM-STAR CORRECT CLEANING & CARE

ALL CHROME THAT SHINES!

Commercial detergents for fittings contain potent acids to effectively remove limescale. In doing so the fittings indeed get cleaned thoroughly, however, there is always the risk of also affecting the surrounding enamel surfaces of the bathtub or the shower tray in an unfavourable way. These surfaces react with acid and gradually become dull and rough. The Cramer Chrom-Star not only removes even heavy stains leaving shining fittings but with its new and enamel-friendly formulation it is also non-hazardous to the surrounding surfaces in the bathroom and leaves them sparkling as well.

PRODUCT INFORMATION:
