

FUGI PROFESSIONAL SET OF 5 PIECES

GROUTING WITH GUIDES

All standard sealants can be handled more easily with the FUGI Professional and will grant you flawless joints– even when dealing with more challenging and complex worksites. Intelligently affixed guides help bridging intersections or evenly crossing other grout lines. And on top of that you do not have to use soapy water when grouting and thus preventing mould from forming underneath the joint. With the Cramer-FUGI you are furthermore able to redo small parts of grouts or fill gaps without removing the existing joint. The FUGI saves time and trouble and rewards you with flawless joints.
