

MINERAL-STAR CORRECT CLEANING & CARE

CAR POLISH FOR THE BATHROOM?

More and more customers decide on mineral cast appliances for their bathroom. Washing basins, shower trays and bathtubs – the processing of this material gets increasingly versatile. However, the knowledge of how to clean this material does not grow comparably. Already after a few weeks of using wrong cleaning agents scratches or mat spots can appear and thus dampen the joy at these surfaces. We now have developed a new cleaning agent specifically for this material. Our Mineral-Star cleans the sanitary objects hygienically without affecting them. Henceforth there is no more need for car polish or another „panacea“ to keep mineral cast appliances like new.

PRODUCT INFORMATION:

ORDER NUMBER	30250
DESCRIPTION	Mineral-Star 100 ml
