

## Secura Grab Rail - Contents and Installation guide.

- **Decide on location of grab rail and use masking tape to cover the area**
- **Unscrew cover plates on grab rail and slide them towards the grab rail**
- **Draw around base plate with a pencil once in its desired position**
- **Using the Allen key provided remove base plates from grab rail**
- **Check the fixings supplied are adequate - This is the installers responsibility**  
(Byretech will not be held liable for poor installation practice or incorrect use of fitting / fixings)
- **Mark hole locations and drill - 8mm masonry drill bit to depth required**
- **Insert raw plugs and screw bases to wall**
- **Push on grab rail - tighten Allen key - screw back on cover plate**
- **Installation is now complete**
