

SHOWER DOOR SEAL

Tools required to complete the installation.

- Stanley Knife or Scissors

- Tape measure

- Masking Tape

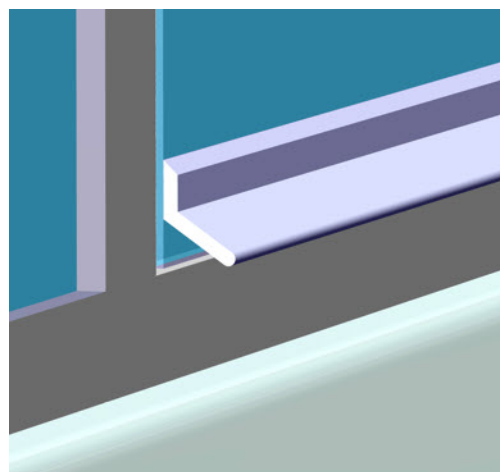

- **Fugii II Silicone applicator**

- Kitchen roll to wipe fingers

Suitable for most shower doors up to 1m in width.

Not suitable for inward sliding shower doors.

Installation instructions

- This seal is designed to fit on the inside of the Shower Door and deflect water into the shower tray and prevent leaks.
- Measure the opening door width and cut the Shower Door Seal profile to the same length. **Note. Get yourself some masking tape at this point.**
- Clean the shower door at the bottom with either Methylated Spirits or the alcohol wipe provided. Now immediately also wipe down the profile with the wipe to remove any dirt from the seal and in particular the serrated edge side.
- Open the silicone sachet that comes with the kit and apply the silicone in a fine bead along the length of the profile on **the serrated edge part only.**
- **Note - Depending on door design you may need to trim the edge of the seal to allow it to close into the door recess properly. This can be done easily once the seal has been fitted and set firm.**
- With the door fully open, fit the seal to the inside of the door so as the bottom edge of the seal is in-line with the bottom of your screen door. Push gently into place, adjust the seal so as it is straight and well seated on the glass door.
- Once complete, very gently so as not to disturb the seal, wipe with your finger or a Fugii II the sealant and remove any excess. This operation ensures that no water gets behind the seal and weaken the adhesion.
- Should the seal be difficult to hold and align, use 2 or 3 small lengths of masking tape to hold it in place whilst it sets.
- Leave for a minimum of **24 hours to cure** and then gently try to close the shower door. If the the door will not fully close, then trim off a slight amount of seal as shown in diagram 2 to allow the door to close.
- Once completed your shower will be virtually leak free from the bottom of the shower door.
