Check contents of pack before installation.

If there is anything missing, contact our Customer Careline for assistance: +44 (0) 1746 713410

ct fitting will invalidate the guarantee. BEFORE INSTALLATION

The space under this showertray must be ventilated. Sufficient ventilation will be available when using the detachable panel provided. If the panel is not fitted and the tray is surrounded on all sides by tiles or masonry, then a 25mm diameter hole should be drilled through a wall or floorboards to ventilate the underside of the showertray.

- Once fitted the showertray must be tiled in place.
- Putty, mastics or acrylic sealant will damage the surface of the showertray. Only use silicone sealant.
- Areas requiring silicone sealant should be cleaned with methylated spirit first.
- Leave the cardboard tray protector in place in the tray until installation is complete.

Peel back protective film from waste hole inside tray and fit waste outlet. Putty, mastics or acrylic sealant will damage the surface of the tray. Only use silicone sealant.

Place tray in position and fit waste pipe. Make sure pipe work is clear of floor, and base of tray.

Adjust legs where necessary. Check tray is level in all directions (there is a built in fall on the tray for water drainage). **Centre legs MUST make contact with the floor.** Fix legs to the floor using 32mm screws, where accessible.

If necessary, carefully cut the outside edges of panel to fit.

Align the panel up with the tray, fit brackets and mark centre line of brackets onto back of the panel. Ensure the direction arrow on the panel clips point upwards. Fix the brackets to the panel using 16mm screws. Push fit panel into place.

Peel back protective film from back edges of tray. Tile over upstands. Seal wall edges of tray with silicone sealant. Remove film from tray and panel, only remove cardboard tray protector when final installation of enclosure is complete.

IMPORTANT

You must not use or work on the showertray for 24 hours after installation.

DO NOT use bleach, scouring powders, solvents or other aggressive cleaning agents. To clean, use warm soapy water and a clean cloth and rinse off.

NOTE: The tray should be inspected six months after installation, check for any floor movement. If necessary adjust all the legs to ensure they are resting on the floor.
